

## THE ENERGY 2.0 SOCIETY PRESENTS A WEBINAR WITH MATS LEWAN!

Mats is senior staff writer at *Ny Teknik*, Stockholm, Sweden – the major technology weekly in Scandinavia. He is also the managing editor of *Next Magasin*. Mats received his Master of Science degree in Engineering Physics from the Royal Institute of Technology in Stockholm, Sweden. Mats was present at many LENR demonstrations and wrote about cold fusion and Andrea Rossi in his book *An Impossible Invention*:

Cold fusion is an energy source that could provide clean water to Planet Earth, zero-emission vehicles with unlimited mileage, a solution to the climate crisis and much more. It is clean, compact, simple, inexhaustible and . . . physically impossible! At least that is what science has considered since an infamous and rejected scientific claim in 1989.

*An Impossible Invention* is the true story of the Italian inventor Andrea Rossi who might have managed to make cold fusion work in his device the *E-Cat*. But it's also a story of what is considered impossible and why.

**Date: Saturday, January 16**

**Time: 9:30 to 11:00 am USA CST (3:30-5:00 GMT)**

**Please register at: <http://goo.gl/forms/K3gTpMgv7a>**

You can join this event from a PC, Mac, iPad, iPhone or Android device.

Please click <https://uni.zoom.us/j/3192736012> to join. Or, go to <https://uni.zoom.us/join> and enter meeting ID: 319 273 6012

Join from dial-in phone line: Dial: +1 408 638 0968 or +1 646 558 8656  
Meeting ID: 319 273 6012 Participant ID: Shown after joining the meeting.

International numbers available:

January 16, 2016  
15:30 -17:00 GMT

### LENR 101: An Introduction to Low Energy Nuclear Reactions

Part 1: A Brief History  
of Cold Fusion and  
Basic Theory

Part 2: Technical  
Description of the  
Rossi Effect and  
How It Changed the  
LENR Field

Part 3: What's New?  
The Lugano Report,  
the 1 MW Power  
Plant, and What's  
Next . . .
